

## Give an Oral Report

After you have explored the *Let's Explore . . .* **AUTUMN** and **WINTER** DVD, it is your turn to show everyone what you learned! Give an oral presentation to your family, friends or classmates about the information you want to share. Here are some ideas to include in your report:

When do the seasons of fall and winter begin and end?

What is the weather like during this time?

What are animals doing at this time?

Share some fun facts you learned about trees, fruits and vegetables.

Explain the water cycle.
